

Re: XM Satellite Radio

I live in Northern Minnesota. We do not receive the variety of stations that large cities receive. I pay for XM Services. The National Association of Broadcasters should definitely NOT have a say so in our programming. I urge the FCC to reject the NAB's Petition 04-160.

Perhaps the local broadcasters should spend their time and money improving their services, instead of trying to limit satellite radio. It is an obvious conclusion that if free broadcast services were meeting their listeners needs, we wouldn't be paying for satellite radio.
